

Real Club de Golf Guadalmina
Competition Committee

Guadalmina, 27th September 2.009

As said before, the Competition Committee of RCG Guadalmina through its Handicap Delegate has decide to follow the instructions given by EGA for our **Annual Handicap Review**.

This means that, from now on, **every year at the end of the season (October to September)** the Committee will process all the results obtained for every member of Guadalmina in order to obtain a possible **increase or decrease of handicaps**.

The Committee will process all the results that are reported by the Royal Spanish Federation but it would be interesting that the Committee can process also all the results that our members have obtained in their respectives countries while playing there.

So members are kindly requested to **give to the Committe, not only a handicap certificate, as usual, but also their "Activity Report" in their own countries in case that they want those results to be processed in the annual review**. If no results have been given, the Committee will use only those obtained in Spain and will not change their handicap based only in handicap certificates.

The Handicap Review will operate soon, and one year later, players with **less than four single results in competitions** will **NOT** be entitled to an adjusted handicap and **could not be allowed to win a handicap tournament until four results have been processed**.
